Projects

iOS/iPadOS Weather App GitHub

January 2024

Developed an iOS weather app clone leveraging advanced Front End Web Development technologies, including Next.js 14, Tailwind CSS, Zustand, TanStack Query V5, Framer Motion, Custom Hooks, and TypeScript. Demonstrated proficiency in API integration, data collection, and presenting information in a visually appealing and user-friendly manner.

Business Landing Page GitHub

March 2024

Created a website for a local construction company by implementing a professional design from Dribbble. Strengthened my proficiency in modern web development practices, including component-based architecture, form handling, animations, responsive design, type safety, state management, and server-side rendering.

ChatGPT GitHub

April 2024

Developed a ChatGPT clone, replicating OpenAI's chat functionality. Utilized Next.js app router and implemented authentication middleware to enhance security measures. Additionally, Firebase integrated for storing user chats and linking them to Google accounts.
