PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years building production-grade React and TypeScript applications, including complex auth flows, real-time data integrations, and interactive 3D web experiences. Currently a Quality Engineer on an enterprise web application for BMO, bringing a testing-first mindset to front-end work. Led frontend teams in agile environments, conducted 30+ code reviews, and mentored developers.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), Next.js, HTML, CSS, React Router, Vite
State & Data: React Hooks, Context API, Redux Toolkit, Zustand, REST APIs, TanStack Query, Axios
Styling & UI: Tailwind CSS, Shadcn UI, Framer Motion, GSAP, responsive design, Three.js / React Three Fiber
Testing & QA: Jest, React Testing Library, Vitest, Playwright, manual functional and regression testing, test case design, defect tracking, ALM
Backend & Tools: Convex, PostgreSQL, Prisma ORM, Supabase, Better Auth, Git/GitHub, Jira, Agile/Scrum, Claude Code

EXPERIENCE

Quality Engineer (AI & Test Automation) – Cognizant *June 2026 – Present · Client: BMO*

- Perform manual functional, regression, and end-to-end testing on an enterprise workflow web application used in a regulated financial-services environment.
- Write and execute test cases in ALM from business requirements and user stories; create, triage, and track defects through to resolution with developers and analysts.
- Validate multi-step user workflows and UI behaviour, giving the development team clear, reproducible bug reports in an agile delivery cycle.

Frontend Developer (Remote) – Chingu *2023 – Present*

Led frontend development on a California-focused Solar Panel Installation Platform with a cross-functional team of 6–8 developers (Scrum, GitHub Projects). *Next.js*, *TypeScript*, *React Hook Form*, *Zod*, *Mapbox*.

- **Architected authentication system:** responsive login UI and multi-step signup flow using React Hook Form + Zod for validation and error handling.
- **Built admin/worker dashboard:** responsive data-visualization and management views with the Next.js App Router and TypeScript.
- **Integrated Mapbox routing API:** multi-stop route calculation with return-to-origin logic, built with the backend developer.
- **Technical leadership:** set up project structure and coding standards, merged 30+ PRs, conducted code reviews, and mentored teammates on React patterns and component architecture.

Frontend UI Engineer – Paleto Bay GTA 5 Roleplay Server (Alpha Development) *Jan 2022 – Feb 2025*

React, *TypeScript*, *MobX*, *Framer Motion*, *PostgreSQL*, *RAGE MP API · 500+ member community*

- **Gas Station interface:** React components integrated with RAGE MP commands to read real-time vehicle fuel data and trigger in-game refueling actions.
- **Context-aware UI system:** custom React hook that automatically displays the interface when players approach any pump on the map.
- **Core UI components:** login screen and HUD elements with Framer Motion animations, following a shared design system; conducted code reviews with the team.

PROJECTS

Generative AI Chat Platform (In Progress) *Next.js 16*, *TypeScript*, *Convex*, *Better Auth*, *Vercel AI SDK*

- Full-stack chat platform where users bring their own API keys and talk to multiple AI models side by side in one conversation.
- Better Auth with multiple OAuth providers and protected routes; real-time, strongly typed data sync with Convex.
- Streaming responses via the Vercel AI SDK, responsive layout, and GSAP animations.

React Three Fiber 3D Portfolio *R3F*, *Rapier*, *GLSL*, *Blender*, *TypeScript*

- Explorable 3D portfolio with all assets modeled in Blender, a Rapier physics-based character controller, and clickable billboards that open project modals; holds 60fps.

EDUCATION & CERTIFICATIONS

University of Kentucky – Bachelor of Information Communication Technology, Minor in Computer Science
Advanced React – Scrimba (Nov 2021) · Three.js Journey (Feb 2025)
